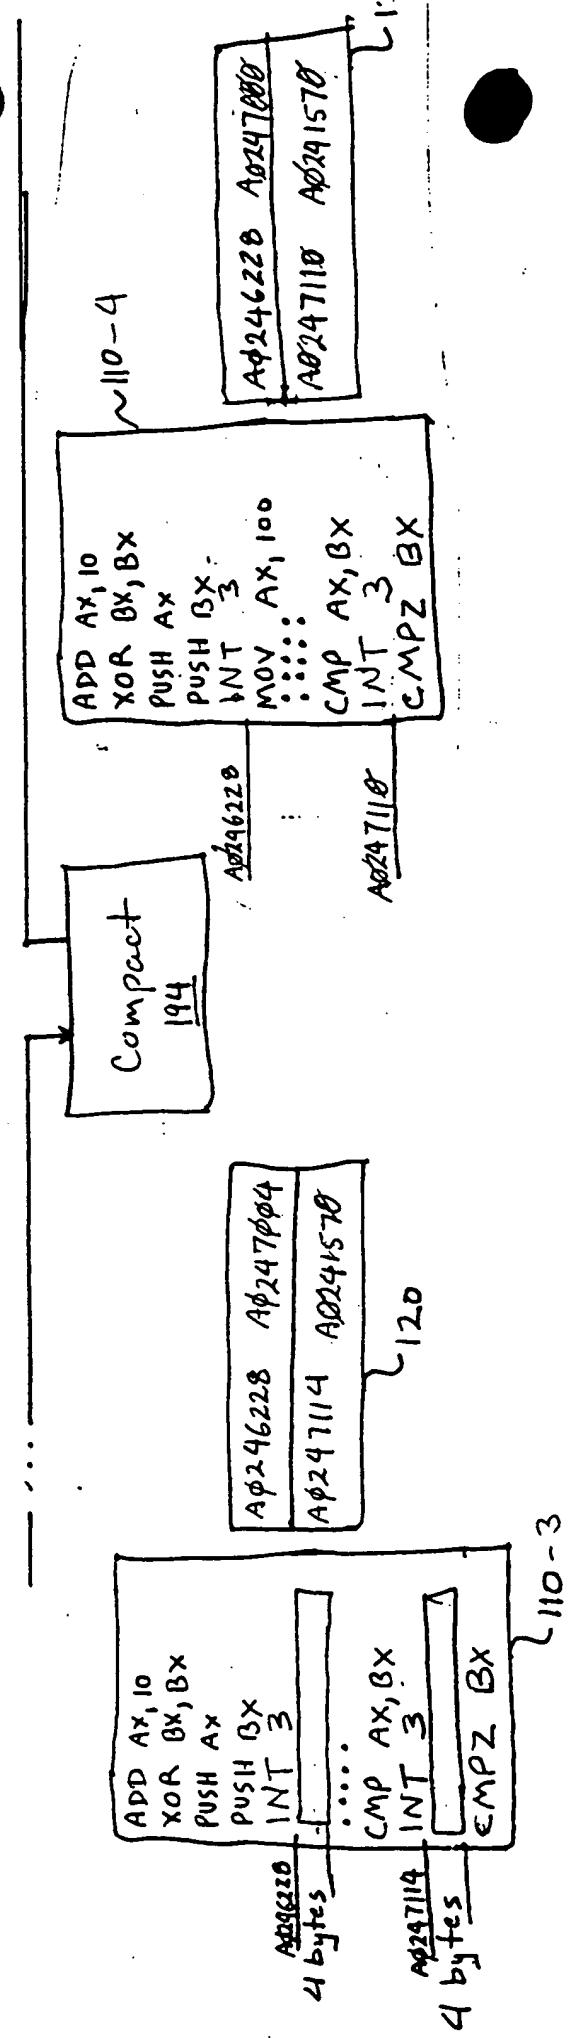

FIG. 1B

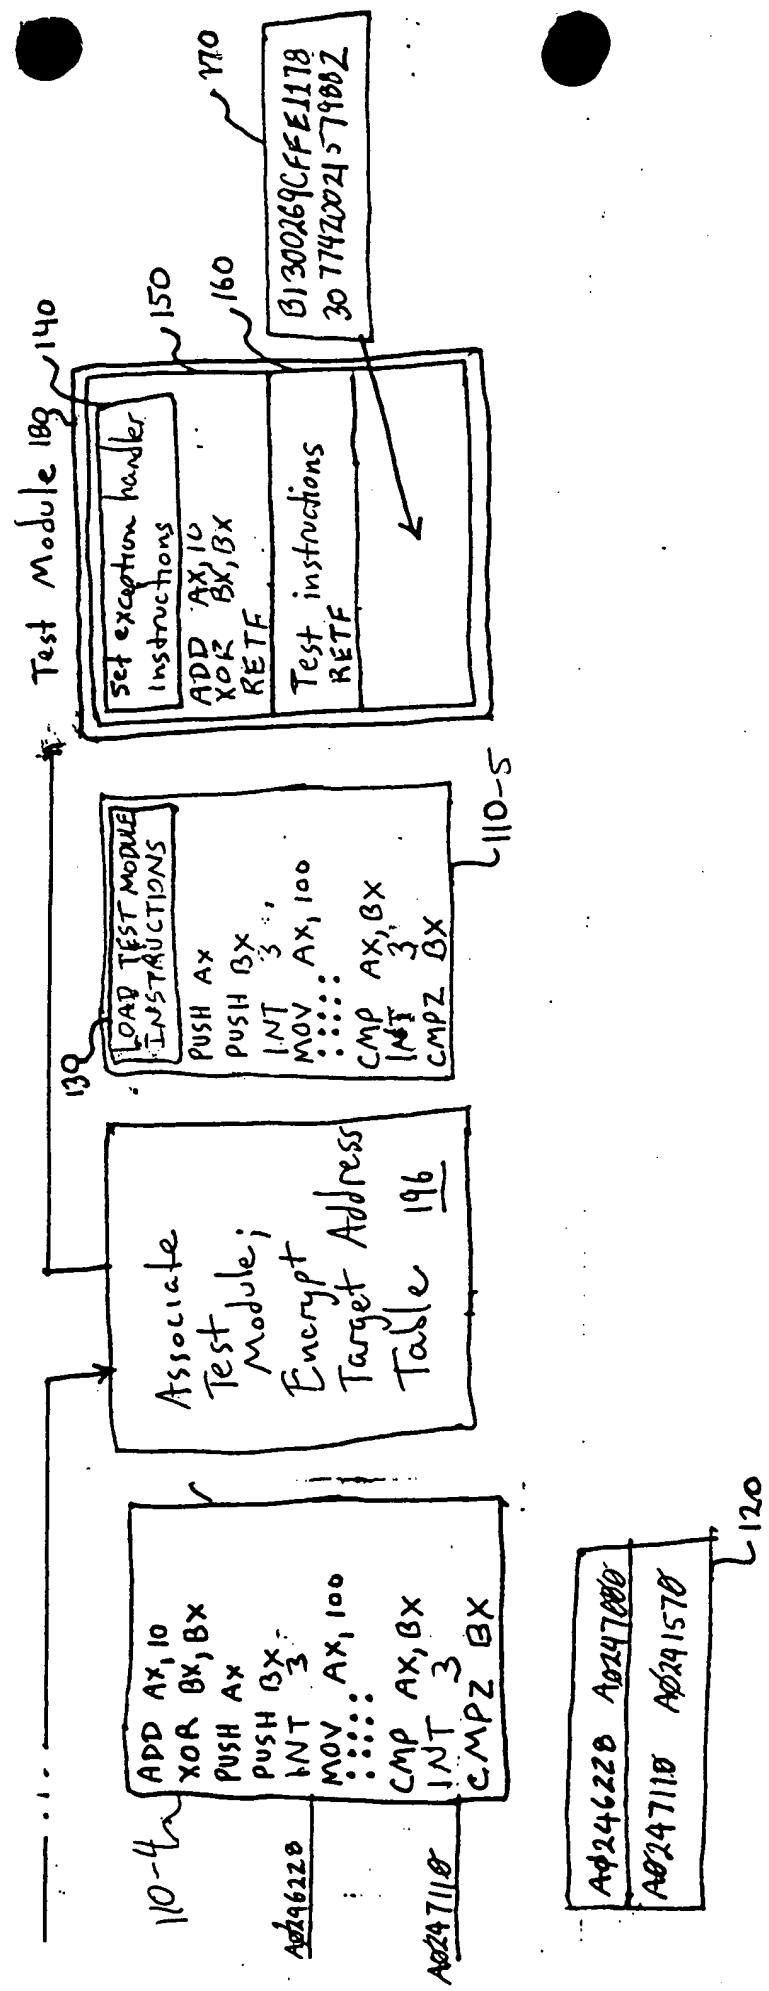

FIG. 1 C

START

Profile instruction sequence
to identify instructions to replace
with instructions to transfer control to
test module

~ 210

Replace identified instructions with instructions
to transfer control to test module and generate
target address table

~ 220

Compact instruction sequence and adjust
address references where required in instruction
sequence and in target address table

~ 230

Associate test module with instruction sequence

~ 240

Encrypt target address table into test
module

~ 250
